ALESSANDRO CAMPOS BOGANTES

IT Support | Systems Analysis | Junior Software Developer

Grecia, Alajuela, Costa Rica | +506 7260 8432 | alessandro.cam.2005@gmail.com | portfolio-blog-psi-three.vercel.app | github.com/Alecam25

SUMMARY

Systems Engineering student with hands-on experience in IT support, hardware/software troubleshooting, and backend web development (PHP, JavaScript, SQL). Comfortable working directly with end users to diagnose and resolve technical issues, and building small-scale applications with relational databases. Completed cybersecurity training at VLA Academy and certified in English at B2 level. Currently expanding into Linux, Python, Go, and Kubernetes, with a goal of moving into systems analysis or junior development roles.

WORK EXPERIENCE

Promoter | **Logitech** *Apr 2024 - Present*

- Deliver technical training and product demonstrations on gaming and productivity devices for customers and retail staff.
- Provide troubleshooting and technical support for electronic devices at the point of sale, reducing product return rates.
- Track inventory levels and technical support requests in Excel, working alongside the store's PM and marketing teammate to flag stock gaps and recurring issues.

Technical Operator | **VR506** *2023 - Present*

- Assemble, configure, and disassemble VR headsets, motion simulators, and racing wheel setups for client sessions.
- Set up and maintain local network connections between simulation PCs and peripherals to ensure stable operation.
- Work directly with clients, guiding equipment setup and resolving issues in real time to keep sessions running smoothly.

PROJECTS

Inventory Management System | **Personal Project**

- Built a web-based inventory system with PHP, MySQL, and JavaScript, including full CRUD operations for products and categories.
- Designed a relational database schema to support efficient data handling and reporting.
- Implemented a user authentication and login system to control access.

Portfolio & Blog | **Personal Project**

- Developed and deployed a personal portfolio site on Vercel to showcase projects and technical skills.
- Built with a responsive, modern front end to present work clearly to recruiters and collaborators.

SKILLS

Programming Languages: JavaScript, PHP, C#, Python (Learning), Go (Learning)

Systems & DevOps: Linux (Learning), Kubernetes (Learning), Git, GitHub, Vercel

Backend: Node.js (Basic), REST APIs

Databases: MySQL, SQL, phpMyAdmin

Frontend: HTML, CSS

IT Support: Hardware troubleshooting, technical support, system optimization

EDUCATION

Systems Engineering | **Universidad Tecnología Costarricense** *2023 - Present*

CERTIFICATIONS

Ciberseguridad: De Fundamentos a Security+ (Course Certificate) - VLA Academy, Nov 5, 2026 (168 hours)

English B2 Certification - VLA Academy, October 2026 (68 hours)

LANGUAGES

English (B2) | Spanish (Native)
